

tkIS India launches Coke Oven initiative at Industry Meet in Ranchi...

'The thyssenkrupp group goes back almost 150 years where the coking business is concerned,' said **Mr Bastian Schimpf, Principal Engineer – Coke Oven Machines, thyssenkrupp Industrial Solutions, Germany**, starting his presentation on the technology portfolio of the thyssenkrupp group. Schimpf was speaking at the International Conference on Advances in Coal and Cokemaking Technology organised by the Indian Institute of Metals, Ranchi on Sept 29-30 2018 at Ranchi.

The technology meet proved a marquee event for the coal and coke oven industry, with a number of key representatives from India's major steel companies being in attendance. Papers presented at the event covered a number of areas involving technology and their applications in coke oven machines and systems by leading technology providers, as well as plant operating experiences by users of various technologies.

Industry presence and networking were at an all-time high, with representatives from companies such as Tata Steel, NMDC, SAIL, JSW, Bhilai Engg Corpn etc.

tkIS India launches Coke Oven initiative at Industry Meet in Ranchi...

Dr Nivedita Panda, Chief Manager – Business Development and Mr Amit Mainde, Sr Manager – Business Development represented tkIS India at the event.

The tkIS group representation at the event, served to underline tkIS India's recent entry into the coke oven business, after the successful transfer of technology to our organisation from Germany.
