

tkSS – KMM

EMS Policy

thyssenkrupp Steel Services (tkSS), a processor of steel and Ken-Mac Metals, a processor of aluminum and stainless steel have made a commitment to strengthen their environmental obligations. In order to fulfill these commitments, tkSS & KMM have implemented an Environmental Management System (ISO14001), and have established the following objectives:

- We will work to reduce or prevent pollution (Air emissions, Wastewater Discharge, Liquid & Solid Wastes and Material use)
- We will work diligently to comply with all legal and other requirements and to assure our employees work with us to assure compliance to our internal requirements
- We will work to minimize the creation of waste and pollution
- We will work to improve upon our current processes
- We will work to assure the processes employed at this facility have no ill effects on our employees, environment or our community environment

It is our goal to assure that we will be responsible corporate partners with our environment, and the public domain.

We will commit necessary resources to assure that the EMS system is successfully implemented, maintained and improved upon on a continual basis. We will review the EMS during Management Review.

Terry Mulholland
Vice President
thyssenkrupp Steel Service
